# Call for Papers

<https://conference.cs.cityu.edu.hk/icicip/>

**Sponsors/organizers: Hassan I University and City University of Hong Kong**  
**Technical Co-sponsor: IEEE Systems, Man and Cybernetics Society**

The Tenth International Conference on Intelligent Control and Information Processing (ICICIP 2019) will be held in Marrakesh, Morocco during December 14-19, 2019, following the successes of previous events. Located in northern Africa, Marrakesh is one of four ancient capitals of the kingdom and listed by UNESCO as a cultural heritage. ICICIP 2019 aims to provide a high-level international forum for scientists, engineers, and educators to present the state of the art of research and applications in related fields. The conference will feature plenary speeches given by world renowned scholars, regular sessions with broad coverage, and special sessions focusing on popular topics.

## Call for Papers and Special Sessions

Prospective authors are invited to contribute high-quality papers to ICICIP2019. In addition, proposals for special sessions within the technical scopes of the symposium are solicited. Special sessions, to be organized by internationally recognized experts, aim to bring together researchers in special focused topics. Papers submitted for special sessions are to be peer-reviewed with the same criteria used for the contributed papers. Researchers interested in organizing special sessions are invited to submit formal proposals to ICICIP2019. A special session proposal should include the session title, a brief description of the scope and motivation, names, contact information and brief biographical information on the organizers.

## Topic Areas

*Topics of contributing papers include, but are not limited to, the following areas:*

### Intelligent Control and Automation

Autonomous systems, linear and nonlinear control, learning and adaptive control, intelligent control, optimization-based and optimal control, fault detection and identification, hybrid intelligent systems, networked control, fuzzy logic control, industrial automation, neural control, process control, robot control, mechatronic systems, environmental monitoring and control, intelligent manufacturing systems, microprocessor-based control, motor control, power systems, vehicle control, aerospace applications, and other applications.

### Intelligent Information Processing

Adaptive filtering & signal processing, audio/speech processing and coding, higher order spectral analysis, nonlinear & blind signal processing, neural signal processing, component analysis array signal processing, array signal processing, parallel and distributed processing, time series analysis, multimedia signal processing, design and implementation of signal processing systems, DSP Implementations and embedded systems, image and multidimensional signal processing, image processing & understanding, computer vision & pattern recognition, bioimaging and signal processing, multimedia communications, computer vision & virtual reality, next generation mobile communications, communication signal processing, modulation and channel coding, network coding, sensor networks, cryptography and information security and other applications.

## Paper Submission

Authors are invited to submit full-length papers (8 pages maximum) by the submission deadline through the online submission system. Potential organizers are also invited to enlist five or more papers with cohesive topics to form special sessions. The submission of a paper implies that the paper is original and has not been submitted under review or is not copyright-protected elsewhere and will be presented by an author if accepted. All submitted papers will be refereed by experts in the field based on the criteria of originality, significance, quality, and clarity. The authors of accepted papers will have an opportunity to revise their papers and take consideration of the referees' comments and suggestions. The Proceedings has been contracted to be included in IEEEExplore Digital Library and submitted for EI indexing.
