**Session Description:**

The investigation of cooperative control, distributed optimization and network game has attracted ever-increasing research attention in both industry and academia due primarily to their explicit engineering insights in many applications ranging from machine learning, mobile sensor networks, global positioning systems to aerospace systems. Nevertheless, there are many key issues that have not received adequately research attention yet. This motivates us organize a special session at ICIST'2024 to gather researchers in the above fields for exchanging and sharing research ideas and opinions. This session is concentrated on the discussion of new methods, algorithms, and challenges of distributed control and optimization from both theoretical and practical perspectives.

**SUBMISSION:**

Papers must be submitted electronically for peer review through online paper submission by **Aug 1, 2024**:

<https://openreview.net/group?id=IEEE.org/ICIST/2024/Conference#tab-your-consoles>.

All papers must be written in English and should describe original work. For guidelines, please follow the ICIST website link: <https://conference.cs.cityu.edu.hk/icist/>.

**Important Dates:**

Aug 1, 2024: deadline for paper submission  
Sep 1, 2024: notification of paper acceptance  
Oct 1, 2024: deadline for final camera-ready papers
